

3- Extraction des données en vu de faire un excel

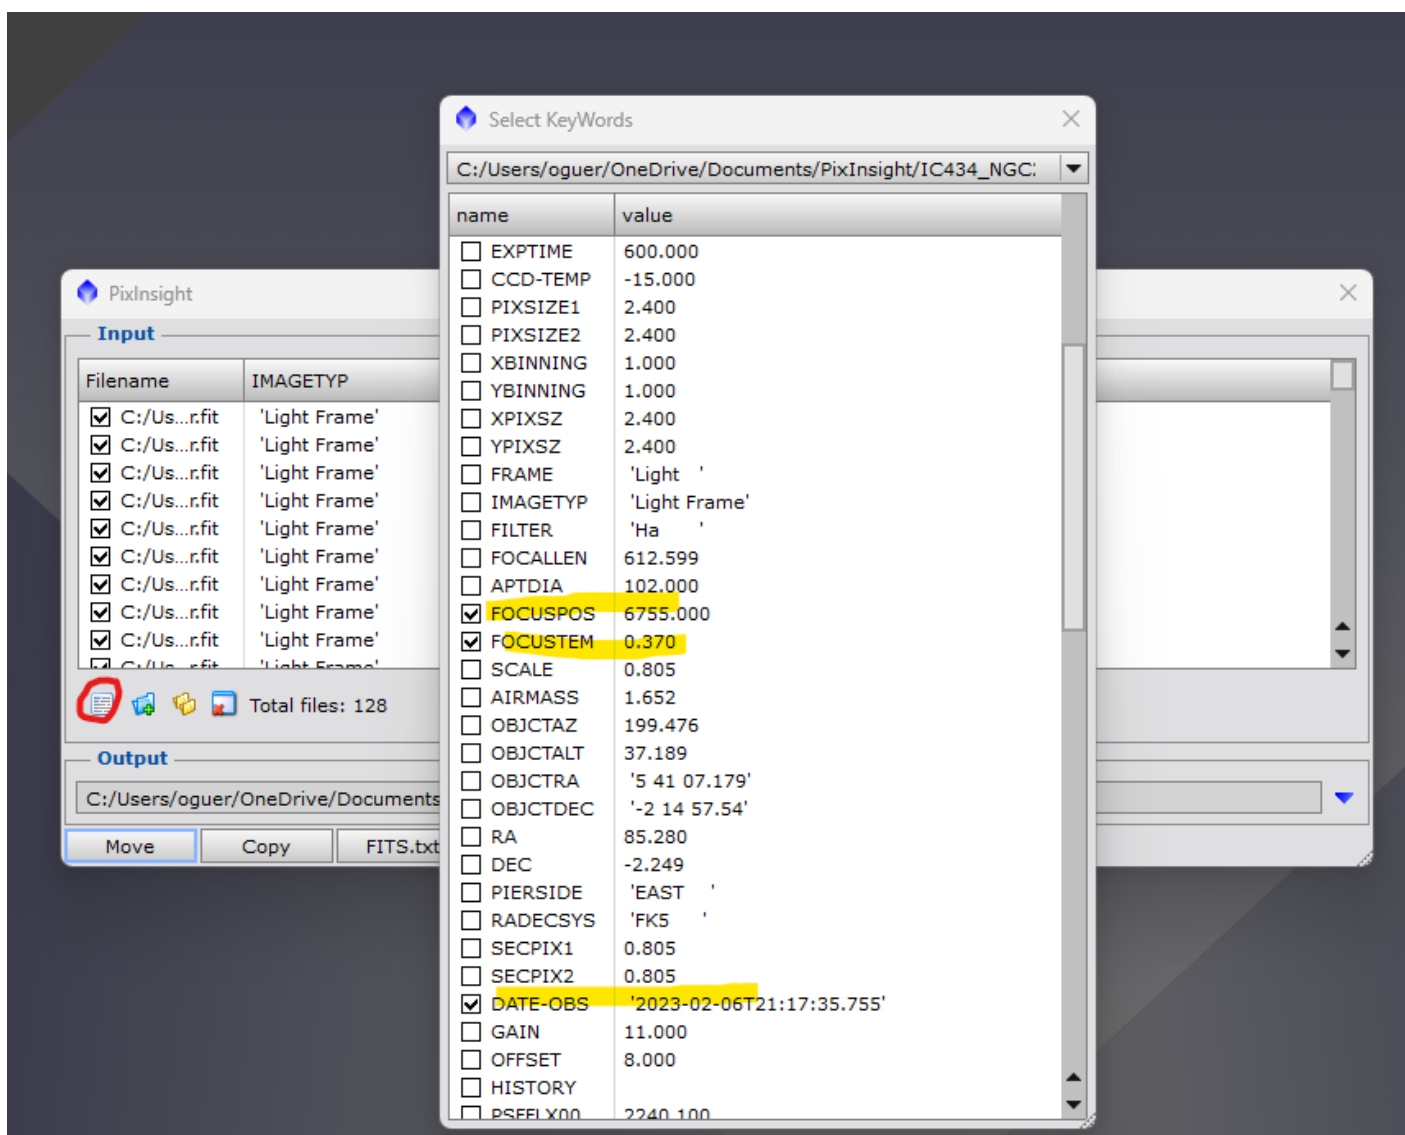

un autre script, FITS Keywords

Même principe que précédent, on ajoute nos fichiers Fits et on choisit un répertoire.

on sélectionne les données que l'on veut extraire (on peu ajoute la date de prise, comme dans l'exemple), :

On ferme la fenêtre "Select KeyWords", et on clique sur "FITS.txt", voici un extrait du . txt

FITS_keys.txt - Bloc-notes
